ABOUT ME

I'm Paras Chandrawanshi, a passionate BCA 2nd year student with strong interest in full stack web development and modern technologies. Skilled in Python, Django, React JS, JavaScript, HTML5, and CSS3, I enjoy building responsive and user-friendly web applications with clean design and efficient functionality. I'm a quick learner with a problem-solving mindset, always exploring new technologies and improving my development skills through practical projects.

EDUCATION

SCHOOLING

Manorama public school pathara

- Class 12th(Biology) : 64 %
- Class 10th : 51%

2024-2027

Rajiv Gandhi College
(Barkatullah University)
& Cybrom pvt.itd

- Currently in BCA 2nd Year

PROJECTS & PRACTICE WORK

Full Stack Django Project

Iron Studio Fitness – Smart Gym Management System

Tech Stack: Django, Python, JavaScript, HTML, CSS, Bootstrap, SQLite

- Built a full stack gym management system using Python and Django with responsive UI and backend integration.
- Developed secure authentication, admin dashboard, and membership management features.
- Designed a modern fitness-themed interface with dynamic forms and database integration.
- Implemented Django models, views, templates, and scalable backend architecture.

UFC Gym Website

Tech Stack: React JS, JavaScript, HTML5, CSS3

- Developed a modern and responsive UFC gym website using React JS.
- Created interactive UI components with smooth navigation and clean design.
- Designed fitness-themed pages optimized for all screen sizes and user experience.
- Implemented reusable React components and dynamic frontend functionality.

Rapido UI/UX Design

Tech Stack: Figma, UI/UX Design

- Designed a modern Rapido-inspired mobile app UI/UX using Figma.
- Created user-friendly layouts, interactive screens, and clean visual design.
- Focused on smooth user experience, responsive design flow, and modern UI principles.
- Developed wireframes, color systems, and prototype-based interface designs.
